## Historical Elegance

JUST A WEEK after this homeowner contacted Haskell Interiors to discuss a total kitchen remodel, designers Haskell Matheny, ASID, CAPS, LEED Green Associate, and Sheila Stubbs arrived at her home to find the space totally gutted down to the studs. Her explanation: "I just couldn't wait to start!"

She purchased the historical home seven years prior but had never been happy with the previous owner's hurried kitchen makeover. The room lacked natural light and did not make the most of the small space. Her wish: a design primed for parties that would also blend beautifully with the home's historical elegance.

To start, Matheny and Stubbs added a large dramatic arched window to let in light and offer garden views. Next, they blended modern amenities with a style that reflects the home's heritage. Hand-rubbed finishes, concealed appliances, specially designed cabinets flanking the window, and a full wall of glass tile are just some of the unique features in the intimate space. The carved custom hood, marble mosaic backsplash, and wood and Venetian glass chandelier punctuate this stylish kitchen. With the remodel complete, the owner finally had the perfect combination of modern conveniences and historical character in her new kitchen.
